

## EDUCATION PROGRAM

Series 600

Policy Title: CURRICULUM DEVELOPMENT

Code No. 602

Curriculum development consists of three interrelated processes.

- 1) Curriculum Development – careful research, design, and articulation of the curriculum.
- 2) Curriculum Implementation – what actually happens in practice as compared to what was supposed to happen.
- 3) Curriculum Evaluation – the ongoing process of collecting, analyzing, synthesizing, and interpreting information to aid in understanding what students know and can do.

The Board will annually review the curriculum cycle and approve changes as necessary.
